ADMINISTRATION MONTHLY REPORT

City Cyber Security Update

The Department of Homeland Security will be conducting continuous network and vulnerability scanning of the City's publicly accessible networks and systems. This will independently identify any vulnerabilities to maintain tactical awareness of operational risks and access our cyber health. If any problems are found, Homeland Security will work with LK Tech to implement protective measures for any potential or actual threats. The Department of Homeland Security provides this service to local and state government agencies at "no cost", saving cities thousands of dollars.

Thank you to Jim White for implementing this process. He attended a cyber security class, hosted by KLC and taught by Homeland Security and the National Guard, where this program was introduced.
